

Press release Calendar Week 26/II

Take it all!!

The Rameder canoe, kayak and surfboard carriers

When compared with surfers and canoeists, skiers find it easy to carry their equipment by car. After all, you can't really get your surfboard or canoe into your boot (not to mention the glove compartment), can you? But **Rameder**, Europe's leading provider of automotive transport accessories, now has a range of special carriers you can use in combination with almost any base carrier. So check out www.rameder.eu!

Only think of the kayak carrier **Niagara** for EUR 89. You can easily affix it to the base carrier with U- bolt or T-slot nuts. Its simple shape will take quite a huge number of different types of boat. The two retaining brackets are made of robust steel and will also take a heavy boat, provided it's not a cruise liner. You will secure the hull with straps, and when folded together the carrier is easy to store, too!

And the canoe and kayak carrier **WB401 Whispbar** (EUR 269) with its integrated loading aids is a real wellness solution. Folding wings make a lateral loading easier, castors loading from the rear. To prevent the equipment from being damaged, all parts are padded. The T-nut-rail quick-dock technology makes for an easy installation and removal, and a lock will keep it secure on the base carrier. Use the enclosed adapter to affix it to both round or angular cross carriers.

Surfers will use the **Board Shuttle 811** (EUR 159), which is characterised not only by its modern telescope design, but also its user comfort. It will easily take two boards of a width of up to 86cm. Robust straps, padded all-over, will secure the boards.

So **Rameder** has done it again: It gives you all you need when you are going out there!
